Carbon Reduction Plan

Supplier name: Scotia UK plc

Publication date: 26 May 2026

Commitment to achieving Net Zero

Scotia UK plc is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: FY25/26 (1st May 2025 to 30th April 2026 inclusive).
Additional Details relating to the Baseline Emissions calculations.

Scotia UK's baseline emissions have been measured by Rawstone Consulting in accordance with the GHG Protocol Corporate Standard, using the operational control approach and cover all seven greenhouse gasses of the Kyoto Protocol (as applicable). Emission sources for scope 1, 2 and included scope 3 categories are as follows:

- Scope 1: Fuels (natural gas and propane) used for heating company premises plus fuel for business travel in company owned/leased vehicles.
- Scope 2: Electricity used in the company premises and as fuel for business travel in company owned/leased vehicles.
- Scope 3 category 4: Transport of Goods for Resale from tier 1 suppliers to Scotia UK plus delivery of products from Scotia UK to customers.
- Scope 3 category 5: Operational waste from all company premises.
- Scope 3 category 6: Business travel from all modes not captured in scope 1 and 2.
- Scope 3 category 7: Commuting emissions
- Scope 3 category 9: Not relevant. All downstream transportation and distribution is paid for by Scotia UK and as such reported in category 4.

Scotia UK plc

Established 1963

Scope 2 emissions are reported using the market-based method, which is the method used to track performance. Location-based emissions for the baseline year were 6.5 tCO_2e.

Baseline year emissions:	
EMISSIONS	**TOTAL (tCO_2e)**
Scope 1	27.5
Scope 2	11.7
Scope 3 (included sources)	39.7
Total Emissions	78.9

Current Emissions Reporting

Reporting Year: FY25/26 (1st May 2025 to 30th April 2026 inclusive).	
EMISSIONS	**TOTAL (tCO_2e)**
Scope 1	27.5
Scope 2	11.7
Scope 3 (included sources)	39.7
Total Emissions	78.9

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:

- Net Zero emissions by 2050.
- 46.2% reduction in scope 1 and 2 emissions by FY30/31.

We project that carbon emissions will decrease over the next five years to 61 tCO_2e by FY30/31. This is a reduction of 23%.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented prior to the FY25/26 baseline. The measures will be in effect when performing the contract:

- Inclusion of electric vehicles in the company fleet.
- Use of LED lighting in company premises.
- Active management of heating to minimise wastage (lowering thermostats; switching off in rooms when not needed).

In the future we hope to implement further measures such as:

- Switching to renewable energy tariffs
- Further decarbonisation of our fleet
- Engaging with our supply chain and customers to reduce their emissions
- Provide employees with the opportunity to use a salary sacrifice scheme to purchase electric vehicles.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
