

SMART Board™ 480 SMART™ interactive whiteboard

Quality and affordability come together in the easy-to-use SMART Board 480 interactive whiteboard, which offers both finger- and pen-touch functionality to engage students and enhance interactive learning.

With the new SMART Board 480 interactive whiteboard, every student can experience the benefits of hands-on, interactive learning. This easy-to-use, touch-sensitive interactive whiteboard combines quality and affordability. It enables teachers and students to interact with lesson content in a natural way using either their finger or a pen.

Interactive learning starts here

The SMART Board 480 interactive whiteboard is an ideal introduction to digital learning. It offers natural touch functionality, which makes it easy for students and teachers to use and will help enable quick and successful adoption. The interactive whiteboard connects to a computer and projector. From their computer, teachers can display and interact with lesson content on the interactive surface, and can control applications and write notes using either their finger or a pen.

Engagement for all students

With the 480, teachers can easily present dynamic lessons that will engage every student no matter what their learning style. By adding vibrant images and videos, teachers can make lessons more appealing to visual learners. They can also add hands-on activities for kinesthetic learners, use sound to engage auditory learners and offer students with special needs more effective ways to manipulate information.

Access to best-in-class resources

Like all SMART Board interactive whiteboards, the 480 is part of a comprehensive solution that includes support, professional development, classroom content and a community of peers. It comes with SMART Notebook™ collaborative learning software, which makes it easy for teachers to create and manage digital lessons. And they can access free, ready-to-use educational resources, including thousands of standards-correlated SMART Notebook lesson activities, anytime on the SMART Exchange™ website.

1 SMART Board interactive whiteboard – The 77" (195.6 cm) touch-sensitive surface responds to finger or pen inputs

2 Durable surface – The hard-coated steel surface is optimized for projection

Key features

Touch functionality

Teachers and students can write or perform mouse functions by touching the SMART Board interactive whiteboard with a pen or finger, and can erase by selecting the on-screen eraser from the toolbar.

SMART Notebook collaborative learning software included

SMART Board interactive whiteboards come with SMART Notebook software, which helps teachers create, deliver and manage interactive lessons using a single application.

Durable surface

The 480 has a hard-coated steel surface that is durable, optimized for projection, compatible with dry-erase markers and easily cleaned with whiteboard cleaner.

Wall mount or floor stand

The SMART Board 480 interactive whiteboard can be installed simply and securely with the SMART Height Adjustable Wall Mount. Alternatively, the 480 can be used with SMART's mobile floor stand, which is equipped with sturdy locking casters and stabilizing safety guards.

USB cables and extenders

Teachers can connect the SMART Board interactive whiteboard to their computer with USB cables, or increase the reach of their USB cable by up to 66' (20.1 m) with USB extenders.

Warranty

The SMART Board 480 interactive whiteboard has a two-year limited warranty.
